JP3167306 A
EXTRA FINE FIBROUS SUBSTANCE
ICI JAPAN

Abstract:

PURPOSE: To obtain the title substance useful for light scattering type liquid crystal display having a penetrable material layer consisting essentially of extra fine fibrous aggregate penetrated into liquid crystal, having excellent transparency in application of electric field, a reinforcing material for optically isotropic transparent optical parts, nonwoven fabric, etc., having an average diameter of \leq a specific value.

[no drawing]

CONSTITUTION: The objective substantially non-orientated substance having $<0.5\mu\text{m}$ average particle diameter.

COPYRIGHT: (C)1991,JPO&Japio
